

Notes

Our service staff and application engineers will be pleased to offer you their assistance as to further information in detail, i. e. to answer your questions or to work out in cooperation with you specific solutions with the aid of our own planning software.

Unless otherwise stated, all load parameters refer to mainly dead static loads at ambient temperature. The indicated permissible loads should be regarded as nominal or working loads and, unless otherwise denoted, refer to the main direction of the respective load; breaking load values are not indicated.

This catalogue may be used by the recipient only. Each part of the catalogue constitutes the property of Sikla GmbH. All technical representations as well as data are given to the best of our knowledge. All representations and drawings are non-binding. We do not assume any liability whatsoever for typographical mistakes or deficiencies.

Modifications and constructional corrections arising particularly from technological development excepted.

Sikla is a DIN ISO 9001 certified company
